

PROGRAM GUIDE

**Building Practitioner Mentoring
Program**

WWW.BI.EDU.AU

PROGRAM OVERVIEW

The objective of this program is to provide learners with a comprehensive grasp of the practical aspects involved in building and construction projects. It aims to enhance their technical skills and knowledge by engaging them in hands-on experiences within a building project.

This program effectively bridges the gap between theoretical learning and the actual implementation of building projects on real job sites. It achieves this through a combination of theoretical instruction, practical coursework, and the utilisation of templates.

The program covers various essential topics, including:

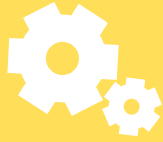

- Planning and managing building and construction projects.
- Reading and interpreting plans.
- Implementing project-specific procedures.
- Implementing strategies to minimize waste on site.
- Estimating costs for materials and labour.
- Creating accurate quotes for project structures.
- Understanding contractual obligations.
